It is 1914. Europe is burning.

On the other side of the world, on an island in the Pacific, a group of individuals united by the shadows of the past embark on a terrifying quest which will lead them to a secret buried on the banks of the Garonne river.

'The first volume of this two-part story set at sea, La Ballade de Magdalena is a breath of salty sea air(...) rarely has a comic album depicted the sea this well, in both its beauty and danger.' - Planetebd
