When Uriaki Posta dies and finds himself in Hell, he thinks there must be some mistake. How could he, a personal development guru with millions of followers, have been sent there? But even with all his rhetorical skills, he can't make the infernal authorities see reason. To be fair, they are having problems of their own: the damned are arriving in droves and the Big Boss upstairs is refusing to take their calls.

A wicked satire devised by Diego Agrimbau and brought to life by Gabriele Ippoliti in his debut album for Dargaud.
