Ady becomes an orphan under mysterious and violent circumstances. He's adopted by Rene Zayer, a powerful businessman and boss of the world's largest pharmaceutical group. After a weird and wonderful quest across the world to try and find the existence of zombies, the businessman puts his time and fortune into something more honorable. He opens "The Island" a hightech, modern orphanage where orphans like Ady can live in peace and rebuild their lives. Well, that's in theory anyway, because the reality is quite different. Confined to the island, Ady discovers that the orphans are nothing more than laboratory zombies that Zayer is studying.
