A French scientist makes a revolutionary discovery and decides not to share it with his employer, a powerful American firm. An escape attempt leaves him badly injured by the company strongmen, and he sinks into a coma. Determined nonetheless to acquire his secret, his ex-employers retrieve the scientist and plug his body into complex machines. Their plan is to manipulate his mind in order to make him believe that he is still in good health, and thus trick him into revealing the secrets of his discovery.

As the series develops, the reader will discover the hero's true condition, as he is forced to participate in the scenarios dreamed up for him by unscrupulous scientists. 'Frontiers' brings us into the unsettling world of virtual reality and the manipulation of the mind. A gripping thriller, where illusions are the only reality. The series is to unfold over 4 volumes.
