Hayden is a young warlord with big dreams but little money, who is convinced that he can regain his family's fame and fortune by finding the mythical pots of gold at the end of the rainbow. Then his father returns crippled from a battle in Aquitaine and asks Hayden to take his place and to continue his spying activities and his trade in counterfeit money. Hayden is less than excited by this idea until his father tells him that there are lots of rainbows in this part of southwest France.

After a formative journey full of adventures and surprising encounters, Hayden reaches the area and runs into Rainor, a young woman everyone seems to avoid because she brings rain wherever she goes. Sometimes they invite her to water the ground after a long drought, but as soon as her job is done she is sent away without so much as a thank-you.

Fascinated by her, Hayden makes her acquaintance. Then, by using Rainor's knowledge and expertise, as well as her innate magical powers, he succeeds in creating rainbows. But will he find pots of gold at their edges?
