Using the contemporary soap opera's structure as a basis, Thomas Cadène initiated one of the most surprising collective works on the Web by bringing together a whole generation of blogging artists. A cross between graphic novel and manga, drawn with total graphic freedom and written like a day-by-day journal, The Others develops an innovative yet very down-to-earth approach to the graphic novel. This series, full of love, tears and tragedies, reveals the best prize-winning talents of today.
