267 * 225

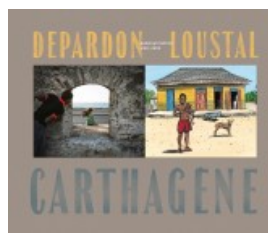

RELEASE
13/11/2015

Magnum Photos and Aire Libre joined forces in 2014 to create a collection of books in which comic strips tell the story behind photography and in which the most famous photos of the past 70 years are described through a comic strip account.

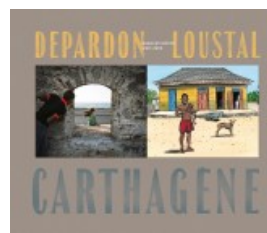

As an extra to this view of the great events in modern history, the partners decided to go even further by giving combined teams of photographers and illustrators carte blanche.

The result of this cross-vision and shared experience is a selection of unusual and completely original images that will be offered to the public in the form of high-quality finish coffee-table books.
