It was at the end of the 1960s that Walthéry, Peyo's assistant at the time, drew the first outlines of Natacha on paper. He created a few pages, which he submitted to the publisher Dupuis. The publisher immediately accepted the project: at the time, there were not many real heroines, since women were systematically relegated to the role of foil for the great, handsome and strong masculine heroes.

In this series

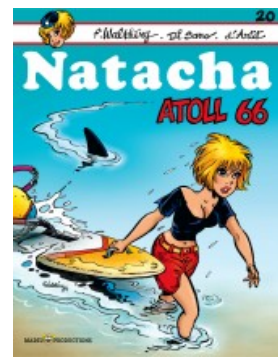

Sur les traces de
l'épévrier bleu

L'Épévrier bleu

Le regard du passé
