With "Petit Père Noël", discover a new approach to the comic strip. Intended for readers of all ages over four, this entirely silent adventure develops a sense of narrative in the youngest of children through a hectic adventure. After a first accompanied reading, the child literally monopolises the book and its world, incessantly reading and rereading the pages, losing himself in the pictures in search of the smallest detail. For the youngest, this is an original way of getting to grips with the comic strip. As for older people, they will enjoy Trondheim and Robin, unanimously recognised for their creativity and talent in developing new worlds.
