A young poet forced to undergo electroshock therapy: Lou Reed. A Welshman who came to New York to play experimental music: John Cale. A lost soul and drug addict who can play guitar: Sterling Morrison. And a friend's little sister on the drums: Moe Tucker. The four of them came together to form The Velvet Underground, which would soon gain a cult following and go on to revolutionize rock music in the second half of the 20th century, influencing countless bands up through the present day. Far from a hymn of praise or an encyclopedic biography, author and musician Prosperi Buri offers up a story of The Velvet Underground which is in large part his own story: that of a die-hard fan of the band. Funny and moving, insightful and sordid, Buri's tale strikes just the right note through its impassioned honesty.
