We're in Kiev, in the year 2050, and Vlad is an ex-officer of the Red Army who now spends his days floundering between odd jobs and liquor bottles. But his bleak situation suddenly brightens at the news of a substantial inheritance that he is about to receive. The only problem is, in order to get his hands on it, he has to find his twin brother Igor and they don't really get along- in fact they're complete opposites. Plus, it would seem that misfortunes always come in pairs, because Igor has recently disappeared, taking with him a briefcase whose contents have already cost the Russian president his life. Vlad sets off on an infernal chase to the furthest edges of a futuristic Russia bathed in blood and wreathed in flame. Discover all seven volumes of this action saga from Swolfs and Griffo! The latter's artistic talent shines here as an accompaniment to a story whose power lies in its unusual non-linearity. Swolfs has taken inspiration from road movies to bring us this tale of shamanism and conspiracy that will lead down many unexpected paths.
